## EXPERIENCE

---

### Mid-Level Frontend Developer

2019-Present

#### Kingdom Digital Solutions

- Built responsive websites using HTML, SCSS, and JavaScript, collaborating with designers and backend developers for smooth functionality and UI/UX
- Used GSAP and Motion One for animations to create interactive user experiences
- Worked and maintained on dynamic website content using components-based approach in CMS
- Integrated APIs for real-time data transfer between frontend and backend
- Implement responsive design principles and ensure compatibility across platforms
- Optimized websites for performance, accessibility (WCAG), and SEO
- Debugging and troubleshoot issues to ensure layout or functionality work seamlessly
- Integrated Google Analytics, generating reports for user statistics and marketing performance
- Created interactive AR effects for Instagram and TikTok, incorporating logic and gamification
- Created microsites to support marketing campaigns, incorporating content from social media platforms
- Documented project guidelines, formats, and standards to ensure consistency across deliverables
- Mentored juniors and interns, guiding them on best practices, task prioritization, and new technologies

### Internship

2019

#### Beshnas Technology

- Built landing pages for desktop and mobile using HTML, SCSS, and JavaScript
- Designing materials like images, icons and banners assets for a website
- Proposed design concepts, managing color schemes, typography, and imagery for web UI
